Sunnyvale Day 1: Production-Ready AI

The 'Now' – Solving for Scale

Start building tools. Day 1 is dedicated to bridging the "Proof-of-Concept Gap"—the difficult space between a successful demo and a live, enterprise-grade application. We are moving beyond the novelty of "cool prompts" to focus on the engineering rigor required for the real world.

- **Architecture for Scale:** Learn how to design robust AI systems that don't just work once, but work every time.
- **Data-Driven Evaluation:** Replace subjective "vibe checks" with rigorous, programmatic assessment. Implement adaptive rubrics and tool-use metrics to ensure reliability.
- **Security:** Deep dive into enterprise-grade protection for AI workloads.

–

To participate, you **must bring your own laptop and power cable**. The activities are intended for laptops and cannot be completed on a tablet or phone.

Note: Please fill out the registration form to express interest in joining the event! Capacity is limited and registration is required.
