Sunnyvale Day 2: The Future of Multimodal

The 'Next' – Capturing Innovation

The era of the text-only chatbot is evolving. Focus on the bleeding edge of AI: Multimodality. We'll explore how to build intelligent agents that can see, hear, and

What to Expect:

- **Multimodal Gemini Agents:** Coordinate agents to analyze video and audio while maintaining character consistency across multi-turn image generation.
- **Intelligence Beyond RAG:** Move past simple retrieval with hybrid search, context engineering, and multi-agent pipelines.
- **Real-Time Live Interaction:** Build low-latency, interruptible agents that "see" and "hear" using the Gemini Live API and bidirectional streaming.

–

To participate, you **must bring your own laptop and power cable**. The activities are intended for laptops and cannot be completed on a tablet or phone.

Note: Please fill out the registration form to express interest in joining the event! Capacity is limited and registration is required.
